Portfólio: gabrielbiscaia.com.br

Education

Universidade Estadual de Maringá (UEM) (2020-2024)

Bachelor's Degree in Computer Science.

Professional Experience

Digimax | Data Scientist (11/24 - present)

Developed Python APIs using Flask and SQLAlchemy for third-party API data integration. Created and managed MySQL databases. Developed Power BI dashboards using DAX formulas with MySQL data integration. Created technical documentation using flowcharts and detailed specifications. Managed VPS migration and backup using cPanel and WHM. Used Git and GitHub for version control.

devfellowship | Full-Stack Developer (05/24 - present)

Developed applications using Next.js with Tailwind and TypeScript. Deployed through Vercel. Used Git and GitHub for version control. Developed components and screens using React Native, Styled Components, and React Native Paper. For the backend, utilized NestJS combined with Axios to configure routes.

VG Educacional | Game Developer (04/23 - 11/23)

Developed features for a gamified platform using Unity and C#. Used Git along with GitHub for version control.

VG Educacional | Game Developer (05/21 - 12/21)

Developed educational games using web technologies: HTML, CSS, and JavaScript without the use of any frameworks. Additionally, I used the Construct 3 engine for programming games through event sheets in some games.

Extracurricular Courses

- Java COMPLETE Object-Oriented Programming + Projects (Nélio Alves)
- React Native: Develop Native Apps for Android and iOS (Cod3r Online Courses)
- Complete Modern Web Course with JavaScript + Projects (Cod3r Online Courses)

Knowledge

Technologies: HTML5, CSS3, JavaScript, TypeScript, Node.JS, Electron.JS, Next.JS, NestJS, Tailwind, StoryBook, React, React Native, Java, Spring Boot, Git, GitHub, Docker, RabbitMQ, PostgreSQL, MongoDB, MySQL, Python, Flask, SQLAlchemy, Microsoft Power BI, GraphQL, Linux, Ubuntu.

Practices: Scrum, REST API, Microservices, Version Control, Clean Code.
